Development, manufacture and sale of underwater drones

Corporate Message

Dive into Frontier

Deep Ocean is full of mystery. How can we make under water as the human territory? FullDepth, the only one professional ROV maker in Japan, provides the solution for it. We already have commercialized ROV DiveUnit300, which can dive up to 300 meters. We'll continuously provide under water drones and solutions by employing cutting-edge technologies as the unique Dive into Frontier Company.
